

A Deep Dive For Early Detection and Longevity Canada's Most Advanced Executive Longevity Health Assessment

Go beyond traditional executive physicals with Canada's most comprehensive and AI-enhanced medical assessment to find disease EARLY and prevent progression.

RegenaLife's Comprehensive assessment redefines proactive healthcare by combining cutting-edge diagnostics, AI-enhanced imaging, and precision screenings—most of which are not available through other standard annual exams in Canada.

Our goal is simple: **detect serious disease early—before symptoms appear—when treatment is most effective for the best outcomes.**

Why settle for standard?

Discover what Elite Executive Longevity Care should look like.

While traditional annual exams may offer general insights, they often miss the silent threats—like early-stage cancer, cardiovascular disease, or neurodegenerative disorders—that can significantly reduce both **lifespan** and **healthspan** (your quality of life).

RegenaLife uncovers what standard check-ups can't.

With exclusive access to the most advanced screenings available in Canada, we help you stay ahead of disease—so you can take action before symptoms emerge.

Exclusive Access

Tests like our AI-enhanced CT angiogram, 51-cancer blood screen and Brain MRI with Alzheimer's Dementia and Parkinson's screen are only available through RegenaLife in Canada.

Technology-Driven

We leverage highly specialized and proven AI systems to analyze scans and detect disease patterns invisible to the human eye.

Why RegenaLife?

Expert Canadian Physician Care

RegenaLife's team includes highly experienced clinicians, radiologists, and specialists, and we coordinate with your doctor and local hospitals as necessary.

Outcome Focused

Our assessments aren't about predicting risk or identifying predisposition to disease—they're about finding and treating actual disease early.

RegenaLife Tests Include:

- ✔ **Full Body MRI + Brain MRI with AI Analysis**
Detect structural abnormalities, hidden tumors, and subtle neurological changes with unmatched detail and precision.
- ✔ **50-Cancer Early Detection Blood Test (Stage Zero Capable)**
A simple blood draw can screen for over 50 cancers—even those for which no routine screenings exist—using advanced DNA methylation detection.
- ✔ **AI-Enhanced Advanced Cardiac CT Angiogram**
Identify hidden soft and hard plaque build-up in the arteries—even in people with **NO symptoms**. This test for heart disease is much more sensitive than standard stress tests, ECGs, and calcium scores, and much more accurate and detailed than regular CT angiograms AND invasive percutaneous angiograms.
- ✔ **Neurodegenerative Disease Screening**
Early detection of Alzheimer's and Parkinson's Disease and other causes of dementia using a powerful combination of blood biomarkers (pTau) and brain imaging, analyzed with advanced AI technology.
- ✔ **Core Executive Health Tests**
Includes all essential tests of a standard executive physical—comprehensive bloodwork, metabolic screening, cardiovascular risk analysis, and more.
- ✔ **Optional Add-on Health Tests**
Also available are full genetic screening for disease predisposition and disease carrier marker identification, as well as identifying the nutrient and exercise response for your genotype. We also offer the most comprehensive hormone and micronutrient analysis to guide corrective action when necessary.

The Truth: Most Chronic Diseases Show No Symptoms—Until It's Too Late.

50% of heart attacks occur in individuals with no prior symptoms.

Most neurodegenerative diseases silently progress for years before symptoms appear.

Many cancers become symptomatic when treatment options are less effective.

But it doesn't have to be that way.

With RegenaLife's Medicine 3.0 Assessment, you gain the insight, clarity, and personalized action plan needed to safeguard your future health—**today**.

Invest in your Healthspan. Discover Disease before it Discovers You.

Contact RegenaLife today to learn more or schedule your personalized RegenaLife assessment through your **Best Doctors Canada Insurance Plan**.
