

Catch health conditions before they become crises

From reactive “sick-care” to proactive healthcare

Prenuvo is the global leader in proactive Whole Body MRI screening, offering a fast (under 1 hour), safe (no ionizing radiation), and non-invasive (no contrast) scan that can help detect stage one cancers, aneurysms and hundreds of other conditions, largely before symptoms present.

Super-powered Super-safe Super accurate

We’ve engineered the Prenuvo experience with your comfort at the core through calming clinics and roomier wide-bore MRI machines tubes. Relax, take charge of your health, and gain peace of mind all while watching your favorite show or listening to Healthtunes anxiety-reducing music.

No more “what ifs”

Images from 33 organ systems of your body capturing 1.3 billion data points from head to ankle including the brain and spine.

Advanced-quality images with unmatched resolution and clarity, helping you detect subtle changes early.

Every Prenuvo report is carefully interpreted and reported by a radiologist. They’ll also provide helpful context in the report for you and your doctor.
